

## Obturaciones

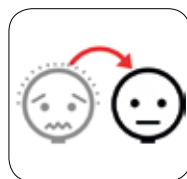

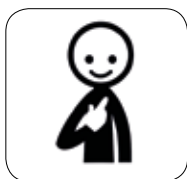

5

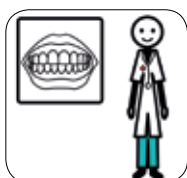

Entro en la consulta y me tumbo en la silla del dentista

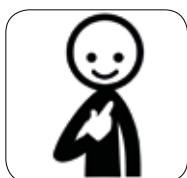

El/la dentista coge los utensilios necesarios

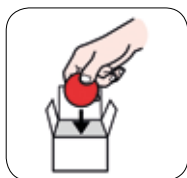

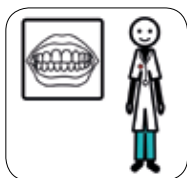

Yo abro la boca y me relajo

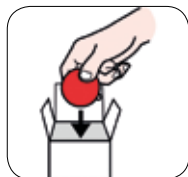

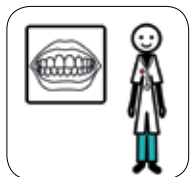

El/la dentista con una jeringuilla me pincha la boca

Yo empiezo a sentir un hormigueo en la boca

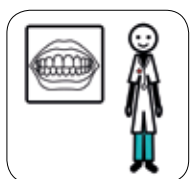

El/la dentista mete un tubo en la boca y recoge la saliva

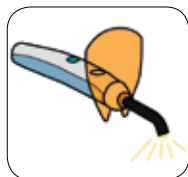

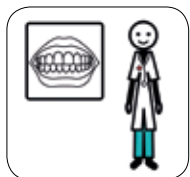

El/la dentista mete una turbina dental en mi boca

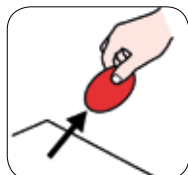

El taladro comienza a vibrar y noto presión en mi diente

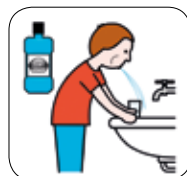

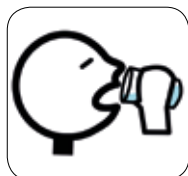

El/la dentista con un composite dental rellena mi diente

El/la dentista con un aparato de luz azul sella mi diente

El/la dentista mete la turbina dental en mi boca para limar el diente

Tomo enjuague bucal para mis dientes y lo escupo

Nos despedimos y salimos de la consulta
