

Extracción dental

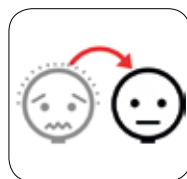

6

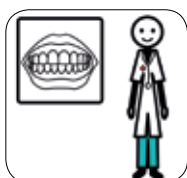

Entro en la consulta y me siento en la silla del dentista

El/la dentista coge los utensilios necesarios

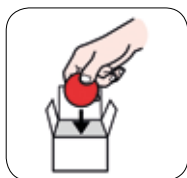

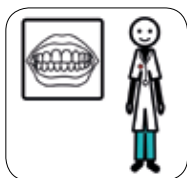

Yo abro la boca y me relajo

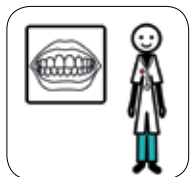

El/la dentista con una jeringuilla me pincha la boca

Yo empiezo a sentir un hormigueo en la boca

El/la dentista mete un tubo en la boca y recoge la saliva

El/la dentista con pinzas saca el diente de la boca

El/la dentista con una gasa me limpia la boca hasta que yo deje de sangrar

El/la dentista con una aguja me cierra la herida de la boca

Yo tomo enjuague bucal para mis dientes y lo escupo

Nos despedimos y salimos de la consulta
